I support Satellite radio and do not think that it should be limited. When I am in my home or car I do not want to have to go to another radio to hear the weather or traffic reports. I pay for these services which are far superior to any station I can get from AM or FM stations. If the NAB does not like the satellite stations taking their listeners away then let them upgrade their own broadcast system and standards. Good competition always helps the consumers. Not only would you be taking the rights of XM away but also our rights to choose what we feel is a better service.

Thank You

James D. Brill
